

Computer Filters

The 3M AF200 Anti-Glare/Radiation Filter significantly reduces screen glare to help prevent eyestrain. It enhances screen contrast for easier viewing – even in brightly lit offices and direct sunlight. It also blocks 99.9% of ELF/VLF E-field radiation, stops static charge and reduces dust buildup.

The 3M PF400 Privacy Plus Filter guards your privacy in an innovative and effective way. With 3M's special microlouver technology, on-screen data is only visible to someone directly in front of the monitor. People looking from the side see a blank, dark screen.

Like the AF200 Filter, the PF400 Filter significantly reduces glare to help prevent eyestrain and enhances screen contrast for easy, comfortable viewing. It also blocks 99.9% of ELF/VLF E-field radiation, stops static charge and reduces dust buildup.

Anti-glare/Radiation Filter
